

# Dear Customer Back-end Fab Transfer due to Fab Reorganization in J-Devices Vol.2

Cypress Innovates Limited  
June/21st/2016

**J-Devices which is one of subcontractor for backend process announced that products in Miyagi/Aizu Plant will be transferred to Fukuoka plant for Lead frame package and Hakodate plant for BGA package. Purpose of transfer is to improve services for their customers and business efficiency.**

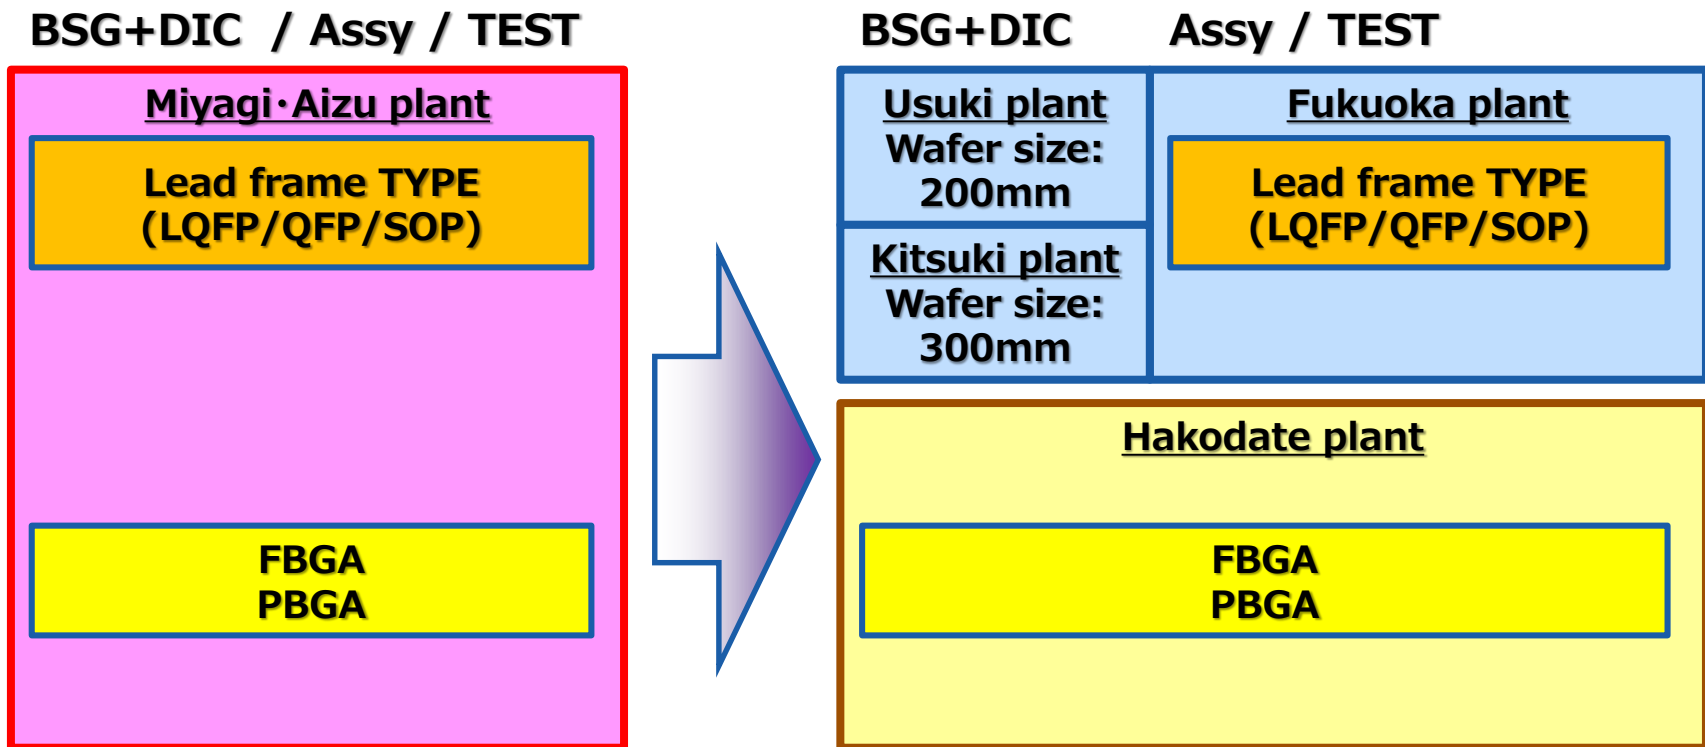

**Transfer will complete by the end of June/2017 as their plan.**

**In addition, request for EOL from Cypress side will not be planned at the same timing of this transfer at all.**

# Reorganization plan

**Lead frame type; Assy and TEST will be done at Fukuoka plant after BSG+DIC at Usuki/Kitsuki plant.**

**BGA type; All process will be done at Hakodate plant.**

# Summary of changing points

## Package type: LF PKG

5M1E	Change points
Man	The operators are trained and certified by Miyagi & Aizu MFG and QA members.
Machine	Use the equal or upper grade model machine.
Measurement	Use the equal or upper grade model machine.
Method	Apply the same QC flow basically.
Material	Use the same materials.
Environment	Apply the compatible manufacturing environments included clean room, water and etc.

## Common items

Items	Change points	
	Change	Comments
Package outline	NO	---
Part number	YES	Part number will be changed.
Marking	YES	Logo will be changed with this transfer.
Shipping form	NO	---
Electrical characteristics	NO	No Change will be confirmed by evaluation.
Surface Mount condition	NO	No Change will be confirmed by evaluation.
Reliability level	NO	No Change will be confirmed by evaluation.
Plating	YES	Change the subcontractor of plating to keep TAT. (Current)Kedika -> (After)Mihara metal industry Fukuoka plant is using Mihara for the main plating subcontractor.

## Reliability test using representative products (Au wire)

Stress Test item	Test condition	pcs.	Duration	Schedule
High Temperature Storage Life Test (HTSL)	150°C	45	1kh	2016.11.E (plan)
High Temperature Operating Life Test (HTOL)	125°C + Bias	77	1kh	
Highly Accelerated Temperature and Humidity Stress Test with Bias (HAST)	130°C/85%RH + Bias	77	96h	
Unbiased HAST (UHST)	130°C/85%RH	77	96h	
Temperature Cycling Test (TC)	-65°C~150°C	77	500c	
Power and Temperature Cycling Test (PTC)	-40°C~125°C + Bias	45	1kh	

- Representative products and test items are selected in terms of die size, package size, materials, technology and so on.
- Preconditioning is processed before HAST, UHST, TC and PTC.
- Criteria is to pass electrical characteristics test at the end of each stress test.

## Reliability test using representative products (Cu wire)
