THE RISE OF 48V: A NEW FOUNDATION FOR SOFTWARE-DEFINED VEHICLES

As Software-Defined Vehicles (SDVs) and intelligent electric vehicles continue to evolve, modern automobiles are incorporating an increasing number of high-power electrical systems, including electric power steering, electric compressors, active suspension systems, and brake-by-wire actuators.

Solutions

Enhance Battery Safety and Performance with a Feature-Rich 48V BMS
 As robotics, industrial mobility, and electrified equipment continue to evolve, reliable battery management has become essential for safety, performance, and operational efficiency.

Power architecture trend

Avnet together with the leading suppliers bring you the best power architecture trend products.

 Abracon Abracon Multi-Phase Assembly Inductors - Engineered for Next-Generation AI Server Cards	 Amphenol Ve-Tera™ series	 ams OSRAM ams AS3722 Power Management Unit	 Belfuse TQPM0Z48B 400V Isolated DC-DC Converter
 Bourns 48 V Power Architecture Trend	 Molex Scale AI Infrastructure with 48V Power Distribution	 Murata Murata OCP HPR 33kW Power Shelf MWOCES-191-P-D	 onsemi Low/Medium Voltage MOSFETs NTMFSC0D8N04XMT WG
 Panasonic Supporting the Shift to 48V AI Power Architectures	 Rohm AG160FNS4FRA: 80V Automotive MOSFET for 48V Power Systems	 Samtec Power Mate® 4.19 mm (.165")	 SiTime Precision Timing for Responsive Industrial Control and Edge AI
 Toshiba Toshiba 80V N-channel MOSFETs for 48V Systems in Automotive Equipment.	 Transcend From 48V Power to High-Performance AI Computing with Transcend	 Vishay XClampR® Bidirectional Flat Clamping TVS in SMD DO-218AC Package
