3.2 EBV shall utilize personal data of Users exclusively in order to allow utilization of the EBV website, which is subject to registration by Users. 5. COOKIES

So-called 'session cookies' are used on the EBV website which are assigned to Users for the duration of their visit, so that the system can recognize them. Session cookies are used to make the system more user-friendly and are automatically deleted at the end of the session unless your browser carries out local storage that goes beyond this due to its individual settings. A user-based evaluation of the surfing behaviour of users by means of the session cookies does not take place.

6. LOG FILES

Each time a site is called up access data are stored in a protocol file, the server log. The data record which is stored in doing so contains the following information:

- the IP address of the User (by which his or her computer can be identified);
- the remote host (name and IP address of the computer that requests the site) the time, status, transferred data quantity as well as the website from which the User has accessed the requested site (e.g. 'Referrer') and
- the product and version information of the browser used (so-called 'User Agent').

EBV only evaluates these log files, for statistical purposes. This serves to optimize the EBV website, for instance by analyzing user behaviour with respect to dates and times and the data volume called up on the EBV Website. In addition, EBV can spot possible errors through the log files, e.g. defective links or program errors, and therefore use the log files for improving and further developing the EBV Website. EBV cannot link the called up sites and uses stored in the server log to determinable persons.

Registration may only be carried out by adults and persons who are authorized to do so for the company stated during registration.
